

# Environmental Policy

## Purpose

At CPH Lounge, we are committed to operating our business with respect for the environment and climate and to continuously reducing the environmental impact of our activities.

Environmental considerations are an integrated part of our sustainability work and management system, based on the principles of ISO 20121 and our circular business model.

This policy covers the daily operations of CPH Lounge as well as our services and solutions related to the planning and delivery of conferences, exhibitions, meetings and events.

## Our Environmental Commitment

CPH Lounge is committed to continuously identifying, assessing and, where possible, reducing the environmental and climate impact of our operations.

We particularly focus on the following areas:

### Circular Economy and Resource Use

Our business model is largely based on reuse. We actively work to extend the lifetime of furniture, exhibition elements, decorations and other materials through reuse, maintenance, repair and alternative applications.

When products can no longer be used within our own inventory, we seek, where possible, to resell, donate or recycle them rather than dispose of them.

### Waste and Recycling

We work to prevent and reduce waste through our circular business model. Waste generated through our operations is sorted to ensure appropriate handling and to maximise recycling where possible.

### Energy and Water

We are committed to using energy and water responsibly in our daily operations and to identifying opportunities to reduce unnecessary consumption.

### Climate and CO<sub>2</sub>e Emissions

We are working to establish a more documented understanding of our climate impact. As part of this work, we measure CO<sub>2</sub>e emissions from goods transportation using our company-owned vehicles in order to establish a baseline and subsequently develop specific reduction targets.

### Responsible Procurement and Suppliers

When purchasing products and materials, we prioritise quality, durability, opportunities for repair and reuse, and products and materials with a lower environmental impact where possible.

We also work to increase transparency within our supply chain and prefer suppliers that can demonstrate their commitment to environmental and social responsibility through relevant standards, certifications and ecolabels.

## Objectives and Continuous Improvement

We work systematically with defined sustainability objectives and use documentation and measurements to continuously improve our environmental performance.

Our current environmental and climate objectives include:

- documenting CO<sub>2</sub>e emissions from our own goods transportation
- extending product lifetimes and reducing waste through our circular business model
- increasing the reuse, resale and donation of products and plants that are no longer used within our inventory
- increasing transparency and documentation within our supply chain
- continuously improving our procurement and waste management processes.

This Environmental Policy is reviewed regularly and updated when significant changes occur in our activities, environmental impacts, objectives or applicable requirements.

The management of CPH Lounge has overall responsibility for the Environmental Policy, while all employees share responsibility for putting its principles into practice in our daily operations.
